To those who have written about the birds of South Asia
so that future generations may learn about them
and further our knowledge with their own contributions to ornithology

Bibliography

of

South Asian Ornithology

1713 to 2022

Introduction

> "*Bibliographers trudge up every hill on their lonely pursuits and bring to the table a more comprehensive list. The very order that bibliography creates, facilitates a reader's disorderly use of it, allowing her to dart directly to a subject in the middle of the work, and thence browsing asequentially through it. Bibliographers accumulate, assimilate, interlace, and organize myriad works from their chosen fields, presenting the curious reader a summation to digest, the oblivious researcher a fructuous springboard, and the stressed librarian a* vade mecum. *Such ardour may not yet have a digitizing replica. But the digital world expands the availability of various forms of publications, ensuring that published books and digital media continue their tango for many more years to come, and bibliography flourish … How technology will modify our experience of books in the future cannot be predicted. Will it ever succeed in recreating their charming antiquity over the longue durée of time's flipped pages, their physicality that panders the senses—the tactile memory of paper, the haunting strangeness of an untrimmed edge, the honey rash on a foxed copy, the aroma of disintegrating lignin, the breathtaking grace of a nineteenth century lithograph, the joyous vision of library bookshelves, the chimeral feeling of being 'book-wrapped'? A digital tsundoku is incomprehensible to me.*"

This bibliography covers a period of over three hundred years, from 1713 up to 31 March 2022. Given its size, it is not unnatural that errors have crept in, especially since every letter, punctuation mark, and number has been physically typed by me over a period of approximately forty years, and counting. In compiling it, my aim has been to preserve, and present, as much as possible, the published record of South Asian Ornithology.

From 2011 to 2024, this database, searchable with keywords, existed at the website URL: www.southasiaornith.in. In 2024 it moved to Zotero, as Bibliography of South Asian Ornithology. I update it almost daily, restricting myself to the period mentioned above, but other well-wishers of the project have taken to updating it thenceforth; ornithologists worldwide have found it beneficial to their work.

That said, I must state that this is still an incomplete record of published South Asian Ornithology. The works that comprise this vast subject are simply too many, located in innumerable places, some accessible, some not, some definitely unknown to me; journals or magazines that were once popular, are now hard to find, if at all; publications that exist/existed that I am unaware of or have no access to; Theses that stand in institutions' departments or libraries of which I am not aware.

In presenting this bibliography, in this Printed Document Format, I have one motive—to make it as accurate and as comprehensive as possible. This can be done by you, the author or reader, as you peruse it, either casually, or by going directly to your name, or the name/s of your friends and colleagues, and running a marvelling finger down the list of their work. If you come across errors, please e-mail the emendations to me at aasheesh.pittie@gmail.com. In subsequent, annual editions, I will upload corrected versions.

This is still a work in progress, and hence, this introduction is kept purposely short. As the great American ornithologist, Elliot Coues (1842–1899) once said, "*Bibliography is never finished, and always more or less defective, even on ground long gone over. It is earnestly hoped that the errors and omissions of this piece of work may be brought by those interested to the compiler's notice*." [Emphasis mine.]

You will find some 'mistakes' no sooner you begin to browse. These are:

1. Author names: I have tried to enter a name as exactly as it was published. Inexplicably, people have either spelled their names in various ways, or editors/printers erred during the printing process. I plan to retain this format despite the consternation it may cause the affected parties, for if I streamline the names, they may not match with the published name. But if you have a concern, please do inform me.
2. There may be instances where scientific binomials are not italicised. This is the result of migrating databases from one computer to another. I am rectifying this.
3. Duplicate entries. I am tackling them daily, reducing their number. Do inform me about those you come across.
4. I have stared at this database so long and so hard that I have become blind to its imperfections. I request you to alert me of its pitfalls.

I intend to add short biographies, along with a bibliography of biographies, of *all* authors listed in this work. The latter will comprise a list of references that are biographical in nature, e.g., appreciations, interviews, obituaries, etc., all of which are contained in a grey-shaded box. This is followed by an alphabetical listing of an author's works. The intention of providing brief biographies is just that, so a reader has an idea of the milestones in an author's life.

In the third edition, besides augmenting the database with additional records, especially from Pakistan, after Prof. (Dr) Gurpartap Singh sent me Aleem Ahmed Khan's bibliography (Khan 1999), I have deleted almost all duplicate entries, and tried to rationalise works of authors that were listed under varying names. These latter are collected within a grey box, below which is their consolidated, relevant bibliography. I have added biographies of a few hundred authors which, I confess, is a small, and woefully inadequate number. But I request your indulgence in this uphill trek and hope you will send me your own brief biographical details to be included here.

I must clarify here that the ornithological bibliographies of India's neighbouring countries are incomplete, and imperfectly listed here, mainly due to the inaccessibility of information and the relevant journals. I hope to improve upon this.

This document cannot comprise a history of the ornithology of the region because it does not include information on those who contributed to it in various ways, other than publishing, e.g., artists, field-assistants, museum- and lab-collectors, philanthropists, ringers, taxidermists, institutional staff, etc.

Abbott, William Louis (1860–1936; USA) [He did not publish.]
Gave up formal medicine and used his private wealth to pursue a passion for exploration, natural history, and collecting, and after retirement, continued his philanthropy to major institutions. Made large collections of mammals and birds, large parts of which were from South-east Asia. Richmond (1896) published a catalogue of his Himalayan collections (Kashmir, Baltistan, and Ladakh).

Adams, Andrew Leith (1826–1882; Scotland)
Physician, geologist, and naturalist. Son of Francis Adams (see below). Professor of natural history, Trinity College, Dublin, and Queen's College, Cork, Ireland. Served as a surgeon with the 22nd Foot, the Cheshire Regiment, from 1849, for seven years at Pune, Karachi, and Rawalpindi, making private expeditions to Kashmir and Ladakh. Unwittingly named the beautiful Tibetan Snowfinch *Montifringilla adamsi* after himself when he quoted from an unpublished manuscript by Frederick Moore. Hume honoured him with the eponymous *Montifringilla adamsi* in 1871, a bird that Adams collected at Mardan, Pakistan.

Aitken, Edward Hamilton [=EHA] (1851–1909; India)

Scottish writer of amusing and accurately observed books especially on natural history subjects. Born at Satara in the Bombay Presidency on 16 August 1851. His father was the Rev. James Aitken, missionary of the Free Church of Scotland; his mother a sister of the Rev. Daniel Edward, missionary to the Jews at Breslau for some 50 years. EHA was educated by his father in India. Passed M.A. and B.A. of Bombay University standing first. Won the Homejee Cursetjee Prize for a poem in 1880. From 1870 to 1876 he was Latin Reader in the Deccan College at Poona, which accounts for the extensive acquaintance with the Latin classics so charmingly manifest in his writings. He was well grounded in Greek. EHA entered the Customs and Salt Department of the Government of Bombay in April 1876, and served in Kharaghoda (the Dustypore of the Tribes), Uran, North Kanara and Goa Frontier, Ratnagiri, and Bombay itself. In May 1903, he was appointed Chief Collector of Customs and Salt Revenue at Karachi, and in November 1905, was made Superintendent in charge of the District Gazetteer of Sind. Retired from service in August 1906. A mosquito, *Anopheles aitkeni*, is named after him.

Alcock, Lieutenant-Colonel Alfred William (1859–1933; England)
Studied medicine at the University of Aberdeen in 1881. Four years later joined the Indian Medical Service and went to India in 1886. Was attached to the survey ship *Investigator* in 1888, when he became Surgeon-Naturalist to the Indian Marine Service and alternated periods at sea with time at the Indian Museum in Calcutta (of which he was Superintendent, at least for some time). His primary interest was in fishes and other marine life. In 1897 returned to England for good and became a member of the Royal Society in 1901. Frank Finn, his successor at the Museum, named a partially albinoid drongo, taken from an aviary, after him: *Dissemurus alcocki* Finn, 1899, later subsumed into *Dicrurus paradiseus grandis* (Gould, 1836).

Alexander, Horace [=Alexander, Horace Gundry]

Alexander, Horace G. [=Alexander, Horace Gundry]

Alexander, Horace Gundry (1889–1989; England)
Quaker, teacher, writer, pacifist, and ornithologist. Keenly involved in 20th-century movements for the protection and observation of birds. One of a small group of amateur birdwatchers who developed the skills and set new standards for combining the pleasures of birdwatching with the satisfaction of contributing to ornithological science. Alexander made many significant observations, mainly in Britain but also in India and the USA, and was well respected for his work. Lived in England for most of his life but made his home in the USA in later years. Close friend of Mahatma Gandhi (who, in 1942, described Alexander as 'one of the best English friends India has') and wrote 'a most perceptive appreciation, *Gandhi through western eyes* (1969)' (Fitter 1990). Awarded the Padma Bhushan (1984). Was also a founder member of the West Midland Bird Club, and its President, during his long residence in Birmingham, England. Authored at least twenty papers on the birds of the Indian Subcontinent.

Alexander, Wilfrid Backhouse (1885–1965; England)
Brother of H. G. Alexander. Educated at Cambridge University. Assistant Superintendent of Cambridge University Museum of Zoology, 1910–1911. On 20 March 1912 became an Assistant in the Natural History Section at the Western Australian Museum, Perth and by 1914 he became Keeper of the Biological department. In June 1920 he was appointed Biologist to the Prickly Pear Board, Queensland, which position he held until August 1925, when he resigned and left Australia. When in England he became Naturalist at the Department of Scientific and Industrial Research, and by 1930 was appointed Director of the Oxford Bird Census. Became the first Director of the Edward Grey Institute of Field Ornithology at Oxford University in 1938, retiring in 1945. Founded the Institute's library, which was later named the Alexander Library. Was awarded the Tucker Medal of the British Trust for Ornithology in 1955. BOU Union Medal (1959). At the time of his death, he was Vice President of the British Ornithologists' Union.

Ali, Sálim [=Ali, Sálim Moizuddin Abdul]

Ali, Sálim Moizuddin Abdul] (1896–1987; India)
Indian ornithologist. Possessing no university degree and originally starting out in the sphere of commerce, in a family mining and timber business enterprise in Burma, he left this at the age of 27 during the depression to take up a course in ornithology at St. Xavier's College, Bombay. Obtained a post as Assistant Curator at the Prince of Wales Museum (Bombay). Later studied under Prof. Erwin Stresemann at the Berlin Museum, and on returning to India became involved in detailed studies of the breeding behaviour of the Baya Weaver *Ploceus philippinus* as well as many regional ornithological surveys under the patronage (vital in those years of economic hardship between the two world wars) of various Princely States…during which he built up his extensive first-hand field knowledge, of many regions. Beginning in the 1930s, his books constituted the first effort by an Indian citizen to educate the population of the soon-to-be independent republics of Britain's Indian Empire on their responsibilities as guardians of nature, providing prophetic insights into the dangers to which nature would be increasingly subjected. The depth of his concern represented a universal language and transcended national responsibilities. He was, indeed, the father of Asian ecological understanding. In 1944 he met Sidney Dillon Ripley, then serving in Sri Lanka with the U.S. Army, and from that chance encounter there developed a most fruitful partnership involving several joint ornithological expeditions to the little-known north-eastern Himalayan regions. They collaborated in the compilation of the seminal ten-volume *Handbook of the birds of India and Pakistan*, completed over a period of ten years. Editorial Board *Newsletter for Birdwatchers* (1962–1975). During his long career Ali was the recipient of three honorary DSc degrees in recognition of his service to Indian Natural History. Joined the American Ornithologists' Union in 1944, was elected Corresponding Fellow in 1948, and Honorary Fellow in 1973. Awarded the Gold Medal of the British Ornithologists' Union in 1967 (the first non-Briton thus honoured), and the J. Paul Getty Wildlife Conservation Prize in 1975. In 1976 received the Padma Vibhushan, one of India's highest civilian awards, and in 1986 was appointed Commander, the Netherlands Order of the Golden Ark. Was a nominated member of the Rajya Sabha, India's upper House of Parliament (1985–1991).

Anderson, J. [=Anderson, John]

Anderson, John (1833–1899; England)

Scientist and naturalist. Was Superintendent of the Calcutta Museum, 1864–1886, and Professor of Comparative Anatomy, Medical College, Calcutta. Was the medical officer and naturalist on the two expeditions that 'were sent to Yunnan in western China to find out why overland trade between Burma [Myanmar] and China had ceased … The first was led [in 1868] by Colonel Edward Sladen, the British Political Resident at the Court of Mandalay, the second [in 1874] by Colonel Horace Brown of the Burmese Commission …' A third, in 1881, was that sent by the Trustees of the Indian Museum to the coasts of Lower Burma, to investigate the zoology of the Mergui Archipelago. Returned to London in 1886, taking an active part in the Zoological Society of London as a Council Member and later Vice-President. W. E. Brooks named a flamingo after Anderson, *Phoenicopterus Andersoni* Brooks, 1875, which was later synonymised with *P. ruber*.

Bahr, Norbert (1958–; GDR, East Germany)

Ornithologist (auto-didact), with interest in taxonomy and systematics. Interested in animals, particularly birds, since early childhood. Denied higher education allowed for political reasons. Worked as a technician. After the fall of the 'Iron Curtain' worked as a bird keeper at a world-famous bird park (1990–2001). Engaged in bird conservation (e.g., for White-tailed Eagles) and birding. Collaborated on the Howard & Moore Checklist (2000–2010). Retired in 2022. Compiled literature on avian taxonomy, on the discovery and description of new taxa, for more than forty years, collaborating with Prof. Jochen Martens from 2005 onwards. Published a series of review papers in the German ornithological journal *Vogelwarte*.

First visited China in 1987, including assisted Chinese scientists with field work in June 1987 on black-necked cranes breeding at Longbaotan and Qinghai Lake in Qinghai province. Beginning in 1990 and through 2009, she conducted research for the International Crane Foundation in collaboration with Chinese scientists on the wintering ecology of the Black-necked Crane *Grus nigricollis* and Bar-headed Geese *Anser indicus* in the Tibet Autonomous Region, People's Republic of China. Over this 20-year period, her work included 15 trips to conduct research. In addition, with two colleagues she compiled and published the first checklist of birds wintering in the Lhasa River watershed.

Blanford, W. T.

Blanford, William T.

Blanford, William Thomas (1832–1905; England)
Geologist. Educated at the Royal School of Mines, London and the Mining School of Freiberg, Saxony. Joined the Geological Survey of India in 1855, retiring in 1882. Was engaged in various parts of India, in the Raniganj coalfield, and in the coalfield near Talchir, where boulders considered to have been ice-borne were found in the Talchir strata—a remarkable discovery confirmed by subsequent observations of other geologists in equivalent strata elsewhere. His attention was given not only to geology but also to zoology, and especially to land-molluscs and to vertebrates. In 1867 was attached to the Abyssinian expedition, accompanying the army to Magdala and back; and in 1871–1872 was appointed a member of the Persian Boundary Commission. Made excellent use of the exceptional opportunities to study the natural history of those countries. For his many contributions to geological science Dr Blanford was in 1883 awarded the Wollaston medal by the Geological Society of London; was elected F.R.S., in 1874, and was chosen president of the Geological Society in 1888. For his labours on the zoology and geology of British India received in 1901 a royal medal from the Royal Society. Was made a C.I.E. in 1904. Principal publications: *Observations on the Geology and Zoology of Abyssinia* (1870), and *Manual of the Geology of India*, with H. B. Medlicott (1879).

Blyth, E.

Blyth, Edward (23.xii.1810–27.xii.1873; England)
Zoologist. Taxonomist. Author. Pioneer of Indian Ornithology. Curator, Asiatic Society of Bengal (1841–1863). Catalogued specimens in the collection of the Asiatic Society of Bengal. Corresponded with Charles Darwin on Natural Selection. Several taxa are eponymously named after him. Blyth's contributions are vast, and hence I have provided a large biographical bibliography for the curious reader.

Bonaparte, C. L.

Bonaparte, Charles Lucien

Bonaparte, Charles Lucien Jules Laurent (1803–1857; France)
French naturalist and ornithologist, nephew of Emperor Napoleon. Travelled to the United States in 1822 where he updated Wilson's American Ornithology, published between 1825 and 1833. In 1824 Bonaparte tried to get the then unknown John James Audubon accepted by the Academy of Natural Sciences, but the ornithologist George Ord opposed this. At the end of 1826 Bonaparte and his family returned to Europe. Visited Germany, where he met Philipp Jakob Cretzschmar, and England where he met John Edward Gray at the British Museum, and renewed his acquaintance with Audubon. In 1828 the family settled in Rome. Between 1832 and 1841 Bonaparte published his work on the animals of Italy, *Iconografia della Fauna Italica*. Exiled from Italy in 1849 for his involvement in the pro-nationalist movement, he died in Paris.

Bowden, Chris [=Bowden, Christopher George Russell]

Bowden, Christopher G. R. [=Bowden, Christopher George Russell]

Bowden, Christopher George Russell (Chris) (1960–; England)
Ornithologist. B.Sc., ecology. Globally Threatened Species Officer, RSPB on various conservation projects involving Asian Vultures, Northern Bald Ibis, Woodlark, European Nightjar, Stone Curlew, a montane forest project in SW Cameroon (for BirdLife International), breeding bird surveys in Egypt, endemic parrots in Dominica, Common Snipe breeding ecology, American Black Duck, American Woodcock, etc. Special interests: Threatened birds, and coordinating their conservation and management. Since 2004 focused on Asian vulture work, mainly based in India, but also co-ordinator of the AEWA International Working Group for Northern Bald Ibis. Currently SAVE Programme Manager since its creation in 2011. Co-chair IUCN Vulture Specialist Group. Chris is a keen birder.

Burton, Sir Richard Francis (1821–1890; England)

Explorer, linguist (he spoke excellent Arabic), author, and soldier, travelled to Cairo, Suez, and the holy cities of Medina and Mecca in 1853, and to the forbidden East African city of Harar (Harer) in 1854 disguised as an Arab pilgrim (Europeans were not allowed in Arabian holy cities; they were executed if they were caught.). In 1855, Burton and three companions (including John Hanning Speke and two other officers of the British East India Company) began an unsuccessful trip in search of the source of the White Nile; African natives killed one member of the expedition in an attack, and Speke and Burton were injured. After a stint as a soldier in the Crimean War, Burton returned to Africa (1857−58) with Speke in order to renew their search. After much hardship, they made it to Lake Tanganyika (they were the first Europeans to see it). Speke continued to the lake that he later named Lake Victoria, the biggest lake in Africa (Burton was too ill, suffering from malaria). Speke realized (correctly) that Lake Victoria was the White Nile's source, but Burton did not agree—their long friendship ended over this disagreement. Burton was appointed consul in Trieste, Austria-Hungary (now a part of Italy), in 1872. In Trieste, wrote and translated extensively. Is well-known for his translation of the 16 volumes of 'The Tales of the Arabian Nights' and other Eastern books. Also wrote 43 volumes about his trips. Was knighted by Queen Victoria in February 1886. [Extensive biographical references on the Internet.]

Butler, E. A. [=Butler, Lieutenant-Colonel Edward Arthur]

Butler, Edward Arthur [=Butler, Lieutenant-Colonel Edward Arthur]

Butler, Lieutenant-Colonel Edward Arthur (1843–1916; England)

British officer. Born in Warwickshire and educated at Eton, he served with the Army in Gibraltar (3 years), India (11 years) and South Africa, retiring from the Royal Irish Rifles in 1884. Butler contributed notes to *Stray Feathers*, to A. O. Hume's *Nests and eggs of Indian birds* (1873), and to other publications. He was an extremely good field-ornithologist, with a wonderful 'eye for a bird,' instantly recognizing any species he had previously met with at the merest glimpse of it, and at almost any distance. Many birds and eggs from Butler's large collections are now in The Natural History Museum, London, some having been presented direct, others having come with the collections of his son, Arthur Lennox Butler, G. E. Shelley, A. O. Hume, and Lord Rothschild.

Champion, F. W. [=Champion, Frederick Walter]

Champion, Frederick Walter (1893–1970; England) Forester and naturalist, son of eminent entomologist, George Charles Champion. Educated at Guildford Grammar School. His elder brother, Harry G. Champion was also a well-known forester in India, and wrote among other books, *A survey of the forest types of India*, which is still used today. F. W. Champion began photography at a very early age. Joined the Indian Police (1913) and was posted to Bengal. In 1915, against orders, joined the Indian Army and saw action in the Third Afghan War. In *c*.1919 returned to the U.K. to study forestry, graduating at the top of his class. Joined the Imperial Forest Service in 1922 and returned to India. He was a Divisional Forest Officer and later

Conservator in the United Provinces. He finally left India in December 1947, after which he became Provincial Forest Officer for Kilimanjaro and the Serengeti, in Tanganyika (later Tanzania), from where he finally retired to Scotland in 1955. A pioneer of wildlife photography in India. Using a camera trap he photographed tigers and inspired Jim Corbett to turn to wildlife photography. Cuvier, Jean Léopold Nicolas Frédéric Dagobert, Baron (1769–1832; France)

Scientist and tutor. Son of a Swiss officer in the service of France. Studied at the academy of Stuttgart. From 1795 taught in the Jardin des Plantes. Became permanent secretary (1803) of the Academy of Sciences and later made chancellor of the University of Paris. A pioneer in the science of comparative anatomy, he originated a system of zoological classification that comprised four phyla based on differences in structure of the skeleton and organs. His reconstruction of the soft parts of fossils deduced from their skeletal remains greatly advanced the science of paleontology. The flying reptile pterodactyl was identified and named by Cuvier. He rejected the theory of evolution in favor of catastrophism. Cuvier held various high posts in the

government and did much to develop higher education in France. The baronetcy was bestowed by Louis XVIII.

D'Oyly, Charles [=D'Oyly, Baron Sir Charles]

D'Oyly, Baron Sir Charles (1781–1845; England) Indian Civil Service and artist. Son of Sir John Hedley D'Oyly, 6th Bart. Was the East India Company Resident at the Court of Nawab Babar Ali of Murshidabad. Appointed as the Collector of Dacca (=Dhaka), 1808–1818, where he took art lessons from George Chinnery (1774–1852). In subsequent years, posts held were: Government and City Collector of Customs in Calcutta (1818–1821), Opium Agent of Bihar (1821), Commercial Resident of Patna (1831–1833) and finally Senior Member of the Board of Customs, Salt, Opium and of the Marine (1833–1839). After serving the Company for 40 years, his shattered health compelled D'Oyly to leave India in 1838. After the death of his father, D'Oyly was conferred the baronetage and was

also knighted. He painted numerous pictures of Indian sites and scenery.

David, Armand [=David, Abbé Armand]

David, Abbé Armand (1826–1900; France)
Lazarist missionary as well as a zoologist and a botanist. Born in Espalette near Bayonne, in the Pyrénées-Atlantiques département of France, entered the Congregation of the Mission in 1848, having already displayed great fondness for the natural sciences. Ordained in 1862, shortly afterwards sent to Beijing, where he began a collection of material for a museum of natural history, mainly zoological, but in which botany, geology and palaeontology were also well represented. Père Armand David made three major trips between 1862 and 1874 through Imperial China, Inner Mongolia and Tibet, faithfully recording his findings and adventures. Best known are his discoveries of the Père David's Deer and the Giant Panda.
